

SUGGESTED PLANS OF MERGER

UNIVERSITY OF OREGON MEDICAL SCHOOL

and

PEOPLES INSTITUTE

and

AFFILIATED AGENCIES

OPERATING THE PORTLAND FREE DISPENSARY

*Suggested at meeting of M.S.P. 2 June 29-30*

THE PLAN

To merge the operation of the Portland Free Dispensary under the name of the Out Patient Clinic, University of Oregon Medical School, as of January 1st, 1931, hoping contributing agencies will continue their support as heretofore by making contributions directly to the Consolidated Out Patient Clinic Budget of the Medical School.

WHAT IS TO BE EXPECTED OF THE PEOPLES INSTITUTE

Continuing the Organization as an auxiliary or guild, but not losing the identity of the name "Peoples Institute". The scope of such an organization could include.:

1. To supplement the general operating and maintenance fund of the Out Patient Clinic.
2. Assisting in maintaining general interest and financial and other support in operating the Out Patient Clinic.
3. Funds to cover salaries of employees not absolutely necessary for the operation of the clinic, but essential to welfare and investigation. (The list might include social workers, anaesthetists, clerks, etc.)
4. An insulin fund.
5. A transportation fund for minor operative and treatment cases needing immediate transportation service.
6. An orthopedic shoe fund.
7. A brace fund.
8. A blood transfusion fund.
9. Subscription to magazines for waiting rooms.

10. Miscellaneous furnishings not absolutely essential to operation.
11. Noon cafeteria service at nominal cost to patients.
12. Christmas presents.
13. Management of transportation for assistance to investigators and field workers.
14. Transportation tickets for students in the nursing and social service field for field work.
15. Maintaining library service for hospital cases.

WHAT IS TO BE EXPECTED OF THE MEDICAL SCHOOL.

1. Assumption of the operating budget of the merged institutions as of January 1st, 1931.
2. Acceptance of the employees of the Peoples Institute with fair consideration in placements in the organization.
3. Assurance that general policies for the care of the patients now in operation at the Portland Free Dispensary will be continued, except those deemed advisable for better treatment.
4. Complete responsibility for the operation of the clinic.
