Society Hears William Silen On March 8 Milford Rouse To Speak At Salishan

Persantine, dipyridamole For long-term therapy of chronic angina pectoris

Therapeutic Effects: In chronic angina pectoris, Persantine may eliminate or reduce the frequency of anginal attacks, improve exercise tolerance, and reduce nitroglycerin requirements. It is not intended to abort an acute anginal attack.

Pharmacologic Effects: In humans, Persantine increases coronary artery blood flow. Animal experiments show increased collateral coronary circulation and the preservation of mitochondrial structure and ATP levels in the hypoxic myocardial cell.

Contraindications, Precautions, Adverse Reactions: No specific contraindications are known. Since excessive doses can produce peripheral vasodilation, the drug should be used cautiously in patients with hypotension. Instances of headache, dizziness, nausea, flushing, weakness or syncope, mild gastrointestinal distress and skin rash have been reported, as have rare cases of apparent aggravation of angina pectoris. Dosage: Fifty mg. (2 tablets) 3 times daily at least 1 hour before meals. In some cases, higher doses may be necessary. Clinical response may not be evident before the second or third month of continuous therapy.

Availability: Tablets of 25 mg.

For complete details, please refer to full Prescribing Information. 6540-III(A)

Under license from Boehringer Ingelheim G.m.b.H.

Geigy

It may take a while. A few weeks or even months after you start him on Persantine (2 tablets t.i.d., 1 hour before meals).

Gradually, the anginal attacks taper off. He can walk farther. Far enough to let him pick up his clubs and wander the greens again.

It's worth waiting for.

VOL. XXII

FEBRUARY, 1967

NO. 2

Deb. 24-26 At Salishan

"WE Are The Medical Society" Theme Of Officers Conference

"WE Are the Medical Society" is the theme of the Seventh Annual Invitational Officers, Trustees and Commissioners Conference of the Multnomah County Medical Society. The conference will be held at Salishan Lodge February 24, 25 and 26.

The three-day meeting is expected to attract more than 100 of the Society's officers, trustees and commissioners as well as a number of physicians' wives and special guests.

Participation Discussed

According to Louis O. Machlan, Jr., MCMS president, considerable time will be devoted to discussing physician participation in the affairs and activities of the society and methods of improving and increasing this participation. Current activities and services provided to the members and areas of expanded activities and services are also expected to come under discussion.

Dr. Machlan, in discussing the conference, explained that the "WE" in the conference theme means each individual physician member of the Society. He said it was one of his prime goals during his year as president of the Society to make each physician more aware of what the Society does for him and to emphasize that the Society can only be as active and effective as each of its individual members is.

All Doctors Invited

The Society's president said that the conference is invitational only in that overnight accommodations at Salishan are limited and that the officers, trustees and commissioners will probably use all available space. However, "any physician who wants to attend the various business meetings of the conference, including Saturday's lunch and dinner, is more than welcome to attend," Dr. Machlan emphasized.

The lunch and dinner on Saturday will highlight the conference. At lunch, Milford O. Rouse, president-elect of the American Medical Association, will be the keynote speaker. At the dinner meeting set for 7:30 p.m., Rex E. Kenyon, immediate past-president of the Oklahoma State Medical Association

(Continued on page 9)

Rouse Has Full Schedule

The AMA President-Elect, Milford O. Rouse of Dallas, Texas, will have a busy schedule while in Oregon to serve as keynote speaker at the annual Multnomah County Medical Society officers conference at Salishan.

Arriving on Thursday, February 23, Dr. Rouse and his wife will travel to Salishan to attend the OMPAC meeting and will stay through Saturday for the MCMS meeting. On Monday, February 27, he will appear on two Portland television programs and then will speak to the Portland Chamber of Commerce at noon that day. The subject of his speech to which all physi-

and considered to be one of the top speakers in the AMA's Speaker's Bureau, will talk.

The actual conference activities begin at 6:30 on Friday, February 24, with registration and social hour. A buffet dinner will be served from 7:30 to 9 p.m.

Commissions To Meet

Saturday's activities get underway with a buffet breakfast at 8 a.m. followed by meetings of the Judicial and Business Commission, the Public Relations and Public Policy Commission and the Grievance Committee from 9 to 10:45 a.m.

From 11 a.m. till noon Max H. Parrott, a member of the Multnomah County Medical Society and a trustee of the American Medical Association, will moderate a panel discussion on Medical Society activities. The luncheon featuring Dr. Rouse will get underway at 12:30 and will conclude at 2 p.m. The hours from 2 until 6 p.m. will be given over to relaxation and recreation with swimming, sauna bathing, golfing, beachcoming and a special movie, "30 Years of Fun" included among the planned activities.

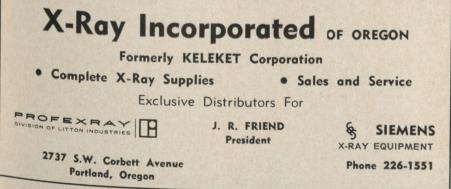

Reception Slated

The evening hours will include a reception from 6:30 to 7:30 followed by the banquet featuring Dr. Kenyon who

has promised to keep his talk on the light side.

On Sunday a buffet breakfast will be served from 8:30 to 10 a.m. This will be followed by a meeting of the Society's Board of Trustees to which all conference participants are invited. The conference will conclude with the adjournment of the Board of Trustees meeting

Deb. 24 At Salishan

"Person To Person Politics" Discussed At OMPAC Meeting

"Person to Person Politics" will be the theme of the state board meeting of the Oregon Medical Political Action Committee scheduled for February 24 at Salishan Lodge on the Oregon coast. The OMPAC meeting immediately precedes the annual Multnomah County Medical Society Officers Conference.

A number of persons closely associated with politics and medical-political activity will participate in the oneday program which is invitational only. These include Rex E. Kenvon, chairman of the Oklahoma Medical Political Action Committee; Mr. Don Blair, executive secretary of the Oklahoma State Medical Association; Mr. Dave Baldwin, assistant director of the American Medical Political Action Committee: Mr. John Pompelli, legislative representative of the American Medical Association and the Honorable Wendell Wyatt, Congressman from Oregon's First District.

A no-host social hour beginning at 6:30 p.m. will be the only planned activity on Thursday, February 23. On Friday, February 24, the OMPAC Board will meet beginning at 8:30 a.m.

Dr. Kenyon Speaks

The conference program actually gets underway at 10 a.m. with welcome and introductions by C. H. Hagmeier of Portland, current chairman of OMPAC. At 10:10 Dr. Kenyon will speak on "Person to Person Politics by Another State PAC". This will be followed at 10:45 with a discussion of "Person to Person Politics' Relationship with the Medical Association". Mr. Blair and Mr. Robert Bissell, associate executive secretary of the Oregon Medical Association, will take part in this discussion.

At 11:15 a.m. the topic of discussion will be "Person to Person Politics' Re-

Dr. Kenyon Discusses Oklahoma Experience

lationship with Other Organizations Taking part in this portion of the pr gram will be representatives of Ass ciated Oregon Industries, Business at Industry Political Action Committe Oregon Farm Bureau, Oregon Sta Dental Association, Oregon Sta Pharmaceutical Association, Oreg Veterinary Association, Osteopath Physicians and Physical Therapists

Congressman Wyatt will be the lucheon speaker. Also scheduled at the luncheon which lasts from noon to p.m. will be a special presentation from AMPAC.

Panel Discussion Set

At 2 p.m. a panel discussion will held on "Person to Person Politics" it Affects the Legislative Committee Panelists include Donald F. Kelly ²

Februa

Clinton S. McGill, both members of the Multnomah County Medical Society and on the Oregon Medical Association's Public Policy Committee, and Roy A. Payne, Clackamas County physician and also a member of the OMA's Public Policy Committee.

At 2:45 Mr. John Misko, legislative representative of the Oregon Medical Association, and Mr. Pompelli will discuss "Person to Person Politics in the Lobby". This will be followed at 3:30 p.m. with a discussion of "Person to Person Politics with the Woman in Mind" by Mrs. Roy A. Payne, a member of the OMPAC Board of Directors.

Period For Questions

The afternoon's program will conclude with a question and answer period beginning at 3:45 p.m. Attendees of the OMPAC conference are also invited to attend the MCMS Officers Conference social hour and buffet which gets underway at 6 p.m.

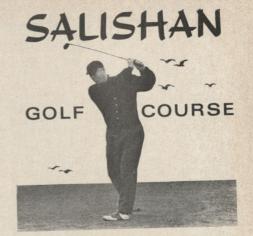

Most of the members of the OMPAC Board of Directors are expected to attend the one-day meeting. The 1967 OMPAC Board was appointed by the OMA's Board of Trustees in early January.

Board members from District I include Mr. C. Walter Folkestad, R.P.M.; C. H. Hagmeier, A. J. Kerbel, E. T. Livingstone, Mrs. Robert S. Miller, Mrs. Roy A. Payne, Merle Pennington and J. Richard Raines. District II directors include J. Allen Henderson, T. Hollis Hendricks, Charles B. Hinds, James H. Seacat, A. M. Tanaka, Frank G. White and George Zupan.

Multnomah Directors Listed

District III directors include Jack E. Battalia, John O. Branford, Mr. Clem Eischen, R. P. T.; John F. Hayes, Donald F. Kelly, Clinton S. McGill, and Lawrence Palzinski, D.O.

District IV directors include John R. Boe, Robert Chiapuio, James H. Harris, George C. McCallum, William R. Post, Clay A. Racely, and Ralph Thompsen. Ex-officio members of the Board of Directors include Blair J. Henningsgaard and Max H. Parrott.

MULTNOMAH COUNTY MEDICAL SOCIETY 13

Let's get down to ea about diuretics

With Hygroton, you'll discover that you can almost always use fewer tablets than is possible with other diuretics.

You may be told that a new short-acting diuretic was found more effective than Hygroton in congestive heart failure-but this was when twice the manufacturer's maximum recommended dose was given.* At the maximum recommended dose for both diuretics, two tablets of Hygroton were far and away more effective than five tablets of the other diuretic in producing natruresis and weight loss. And at these dosages, Hygroton costs only 1/3 as much as the other diuretic.

Since the discovery of chlorothiazide, the trend has been away from short-acting, multiple-dose, highcost diuretics. With Hygroton you can usually do the job with just one tablet a day, or every other day.

More than any of the newer diuretics, Hygroton brings dosage and cost of medication down to earth. *Brest, A. N., et al.: J. New Drugs 5:329, 1965.

Hvgroton[®] chlorthalidone

Indications: Hypertension and many types of edema involving retention of salt and water. Contraindications: Hypersensitivity and most cases of severe renal or hepatic disease. Warning: With administration of enteric-coated potassium supplements, the possibility of small bowel lesions should be kept in mind. Precautions: Reduce dosage of concomitant antihypertensive agents by at least one-half. Discontinue if the BUN rises or liver dysfunction is aggravated. Electrolyte imbalance and potassium depletion may occur; take special care in cirrhosis or severe ischemic heart disease, and in patients receiving corticosteroids, ACTH or distally of the severe ischemic heart disease. ACTH, or digitalis. Salt restriction is not recommended. Side Effects: Dizziness, weakness, nausea, vomiting, hyperglycemia, hyperuricemia, headache, muscle cramps, postural hypotension, constipation, leukopenia, thrombocytopenia, agranulocytosis, impotence, dysuria, transient myopia, skin reactions, including urticaria and purpura, epigastric pain, or G.L. symptome offer pole, skin reactions, including urticaria and purpura, epigastric pain, or G.I. symptoms after prolonged administration. Average Dosage: One tablet (100 mg.) with breakfast data breakfast daily or every other day. **Availability:** Tablets of 100 mg. in bottles of 100 and 1000. For full details, see the complete prescribing information. 6524-V(B)

THE DOCTOR'S OWN PLAN

... still his best guarantee of quality medicine, freely practiced

When the first doctor treated his first patient many centuries ago, the Physician-Patient relationship was established. Down through recorded history, this relationship has been based on freedom of choice for the patient, freedom of action for the physician.

In the 1930s, the Depression-New Deal era brought unrest to the land . . . labor-management strife, wholesale unemployment and unprecedented social legislation. Many regarded this New Deal as a panacea, a cure-all. Such a social climate dramatized the need for a health protection plan stressing Quality Medicine First, guaranteeing the patient a free choice of physicians. During this restless era, OPS-Blue Shield was born. Members of the medical profession banded together more than a quarter-century ago to form Oregon Physicians' Service. The physician is—as he should be—the heart and strength of the OPS-Blue Shield plan. OPS operates in support of the physician and his services.

There is still social turmoil today. Consequently, OPS must continue to emphasize its difference the doctors' own plan (with more than 1200 member physicians) offering Hospital-Surgical plus Medical. OPS cannot overstate the inestimable value of a free choice of doctors and hospitals and —above all—the quality of private medicine, freely practiced.

MCMS Report

Trustees Okay Society Budget, Good Samaritan Cobalt Unit

Consideration of the 1967 budget of the Multnomah County Medical Society was the main item of business at the January meeting of the Society's Board of Trustees. After considerable discussion the budget was approved.

As approved, the budget calls for total expenditures during 1967 of \$72,612.-68, down \$221.79 from actual expenditures in 1966. The expenditures will be more than offset by income which is estimated at \$73,599,97, up \$714.06 from 1966 actual income.

Salaries Biggest Item

The budget estimate of expenditures calls for slightly more than \$35,000 in salaries and benefits for the Society's staff. The next highest item is for office management. This is estimated at slightly more than \$25,000.

Mortgage payments, taxes, and maintenance on the Society's building at 2188 SW Park Place will be \$6,125 in 1967 while commission and committee expenses are estimated at nearly \$3000. Dues and contributions to various organizations will cost about \$2500 during 1967. The final budgeted expenditure is \$1,000 to the Society's Woman's Auxiliary.

Income Mostly From Dues

Income will come primarily from dues of members. This is estimated at \$45,000 during 1967. Other income will come from the Society's Bulletin and stenographic service as well as the radio paging service. Rent from the Society's building will bring in \$4,800 in 1967 while \$1,399.97 of the income is a carry over from 1966.

Looking at the total picture, income in 1967 is expected to exceed expenditures by \$987.29.

In other actions, the Board of Trustees gave Society approval to a plan by Good Samaritan Hospital to install a Cobalt 60 therapy unit. The Board had tabled the matter during their December meeting in order to gather more information. Approval was given after it was reported that the Oregon Radiological Society favored installation of the unit at Good Sam.

Eliminates Holiday

The Board also approved two recommendations of the Society's Executive Committee. The first eliminates Washington's Birthday as a paid holiday for the staff and adds one day, to be mutually agreed upon by the employee and the Executive Secretary, as a paid holiday. This would logically fall in December in order to allow employees time off to do Christmas shopping.

The second recommendation of the Executive Committee which was approved by the Board places the Society in opposition to any increase in the cost of meals served at OMA headquarters. Costs for luncheons and dinners were raised in September, 1966, and it was generally felt that they should not be raised again. In connection with this the Board urged that OMA attempt to cost-account the kitchen operation so that any future raise in the cost of meals could be based on actual costs of operation.

1967

Realistic Disaster Drill Strains Medical Volunteers

Disaster volunteer workers congregated in Benson Hig parking area where mock plane crash killed several hig school volunteer victims and injured nearly 80 more. Volun teer workers included doctors, police, firemen, Red Cross Salvation Army, and many ambulance crews. Disaster occurred

at 9:35 a.m. on Saturday, January 14. Med ical coordinator for drill was Phil Snedecor shown at right talking to reporter.

Disaster victims were hauled out of Benson High School building and into parking area awaiting transportation to city hospitals. Many waited in the cold for nearly an hour as foul-ups prevented ambulance crews from quickly moving victims.

Piled high with debris were three disaster victims. Two were removed by 10 a.m. but the third shivered in wood bin until 10:45 before being taken to temporary morgue inside school building.

Volunteer restains young girl who shouted to ambulance attendants not to take her brother away. Hysterical shock victims seriously hampered rescue operations before the were restained.

Coordinating hospital bed availability are Fred Lawrence, assistant administrator at Good Samaritan Hospital, and unindentified city firemen. Drill at hospitals went much smoother than at disaster sight.

Accident victim blocks narrow driveway, the only entrance to disaster scene. Red Cross truck and ambulances were delayed five minutes attempting to take care of this uncooperative victim.

Wait, Annabelle. Mommy hasn't told the doctor yet that you *need* a shot.

Maybe she does, maybe she doesn't. But if her problem is nasal congestion due to cold or allergy, consider the medication that combines convenience and effectiveness—Novahistine Melet.

Melet is especially suitable in the treatment of children. It's a pleasant tasting, chewable tablet that leaves no after taste or gritty, undissolved particles in the mouth. It provides decongestant action almost as quickly as a liquid, but assures the accurate dosage of a tablet.

Because Melets are so convenient to carry and so easy to take at any time, adults, too, will appreciate this modern dosage form.

Use cautiously in individuals with severe hypertension, diabetes mellitus, hyperthyroidism or urinary retention. Caution adults who operate machinery or motor vehicles that drowsiness may occur. Each Melet contains phenylephrine hydrochloride 10 mg. and chlorpheniramine maleate 2 mg.

PITMAN-MOORE Division of The Dow Chemical Company, Indianapolis

<u>OMA Report</u> 1967 Budget \$182,275; Title 19 Guidelines Approved

A 1967 Oregon Medical Association budget of \$182,275 has been approved by the OMA's Board of Trustees. The budget reflects a marked jump over 1966 figures.

The 1967 budget call for total expenditures of \$178,667.24 with \$3,607.76 being placed in the general contingency fund. This \$182,275 expenditure total is balanced by estimated income. In 1966 actual expenditures amounted to \$161,185.77 with no funds placed in the contingency fund. Income during 1966 was only \$148,656.50 which resulted in a \$12,529.27 deficit. However, \$3,000 of this deficit represented prepayment of 1967 expenses leaving an actual 1966 deficit of only \$9,529.27.

Estimated income during 1967 is up primarily because of the \$25 per member dues increase approved at the September meeting of the OMA's House of Delegates. Funds from membership dues and assessments during 1967 are estimated at \$158,025 as compared to actual income in 1966 of \$105,972.50.

Other areas of estimated income include technical exhibit fees, rent and utility payments by the Multnom County Medical Society, sale of mi cellaneous forms and materials an interest on savings.

Salaries Show Increase

Salaries, wages and employee ben fits account for the largest portion the 1967 estimated expenditures. T 1967 estimate is \$62,076.24 as con pared with \$55,854.30. Part of this crease is attributable to the additi of an assistant executive secretary the staff and to the necessity of emploing a full-time membership secreta and bookkeeper instead of sharing of with MCMS as in past years. Mode salary increases and an \$800 a ye boost in social security tax payme account for the remainder of the crease.

Only a slight increase is estimating general operations and maintenant In 1967 this is estimated at \$44,390 compared to \$44,071.75 in 1966. Direservice to members in 1967 is estimated at \$11,350 as compared to \$10,813.88 1966. Of this total, \$10,250 is estimated for subscriptions for each OMA mether to Northwest Medicine magazine

Febru

Education Funds Included

Another big jump in estimated expenditures is in the category of House of Delegates, Board of Trustees and Officers and Committees. The increase is estimated at slightly more than \$10,000; from \$33,312.38 in 1966 to \$43,775 in 1967. The increase is attributed to funding of the Council on Medical Education which was created by the House of Delegates at their September, 1966 meeting. To balance the OMA-CME expenditures, \$10 of each members dues has been earmarked to this account

OMA's contribution to the Woman's Auxiliary is estimated at \$426 higher than in 1966. This year the estimate calls for \$7,426. This slight increase results because of increased transportation costs to the AMA Woman's Auxiliary annual meeting. Last year it was held in Chicago while this year it will be held in Atlantic City.

Title 19 Guidelines Set

In another major action, the Board of Trustees approved a recommendation that the OMA draft a legislative proposal and/or guidelines to implement Title 19 in Oregon. The Board also agreed that the OMA should wholeheartedly support the introduction and passage of such a proposal in the 1967 legislature.

As presented in the recommendation from the OMA's Special Committee on Title 19 of Public Law 89-97, the guidelines are as follows:

I. The law is intended to bring medically needy persons into the mainsteam of medical care. Since this law is a medical care law instead of a "welfare law", it provides a single standard of medical care.

II. Similar medically-related principles expressed in Title XVIII should be promulgated in implementing legislation under Title XIX as:

- A. Recipient of medical assistance entitled to free choice of physician and hospital for services.
- B. Maintenance of physician-patient relationship including confidentiality.
- C. The best interest of the patient demands that the physician be free to determine treatment and therapy, such as choice of drugs and hospital-
- D. Usual and customary fee by the practitioner for services rendered.
- E. Prohibition against any federal interference Nothing in this title shall be construed to authorize any officer or employee to exercise any supervision or control over the practice of medicine or the manner in which medical services are provided or over the selection, tenure, or compensation of any officer or employee of any institution, agency, or person providing health services; or to exercise any supervision or

Cooperating with the Medical Profession For more than a half century ...

Febru

Title 19 Guidelines Approved

(Continued on page 29)

control over the administration or operation of any such institution, agency, or person.

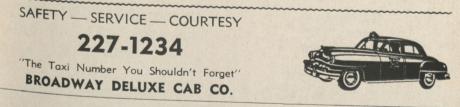

- III. The physician will accept certain obligations and responsibilities:
 - A. The individual physician will accept the responsibility for care of his patients. All medical expenditures under the program are initiated directly or indirectly by the physician.
 - B. The Oregon Medical Association and its component societies stand ready to assist in the development of the controls over the program and in the adjudication of disputes.

IV. The connotations of the word "Welfare" are not such that they give stature to the needy eligible. To this end legislation might well provide for a separation of medical care from the direct control of the Welfare Commission:

- A. Medical Assistance Program be called OM-CARE, with no intimidation or taint of WELFARE.
- B. A DEPARTMENT OF MEDICAL CARE be established, which would encompass OM-CARE, and other related vendor medical care programs. NOTE: Under Title XIX the Welfare Commission need have only the responsibility for determining eligibility. They would, of course, continue to provide social services.
- C. The Department of Medical Care be designated the TITLE XIX, "Single State Agency" and by agreement, utilize the resources of other departments as necessary.
- D. A Board for the Department of Medical Care be established. Composition of Board be a majority of physicians, with other vendor groups, and the public represented. The "Board" would serve as a medical advisory unit.
- E. The Department would be under the directorship of a physician.
- V. Other Title XIX (Or OM-CARE) legislative intent to include:
 - A. Provision for the use of non-government fiscal intermediaries.
 - B. Provision for direct billing.

VI. Program Directions:

- A. Whenever possible, other government-sponsored, medically related, programs be dovetailed into the OM-CARE program. These programs include, but are not limited to: Headstart, Community Mental Health, Community Health Centers, Immunization, Retardation, and Tuberculosis.
- B. The level of medical indigency be realistically derived in area and circumstance.
- C. Provide protection against catastrophic illness, without the recipient's necessity of "spending down" to the eligibility standards before receiving aid.

Vaccination Form Procedures Changed

Multnomah County physicians who have occasion to complete International Certificates of Vaccination for their patients should be aware that a revised certificate is now being used. This revision makes some changes in the old procedures.

Most significant of the changes is that the "Origin and Batch No." of the smallpox vaccine must be included. This formerly was not required.

Also, according to Mr. Larry Berg, Supervisor Quarantine Inspector in Portland, it would save a great deal of trouble and inconvenience to the traveler if the physicians would take the time to read the instructions on pages 10 and 11 of the certificate form. Mr. Berg points out that a majority of the forms seen at his office are not properly filled out.

The most common error, according to Mr. Berg, is that if the person was ever previously vaccinated for smallpox, the next vaccination should be recorded in space No. 2. He says many doctors will use lines la or lb. These, he points out, are for primary vaccinations only.

Mr. Berg also mentioned that a doctor's written signature is the only one acceptable. Stamps are not allowed, and though a nurse may perform the actual vaccination, the doctor must sign.

OMPAC Chairman Reports

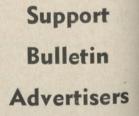

By C. H. Hagmeier

Serving as chairman of the Ore Medical Political Action Committee the past two years has been a challe ing and rewarding experience. I has watched OMPAC's membership dow in those two years. My thanks to of you who made this possible.

OMPAC's growth record in 1966 is of which we can all be proud. Nati ally, (there are now state medical p tical action committees in all 50 state Oregon ranked 7th in total dollars of tributed, 2nd in the number of me bers versus potential, and 3rd in lars per physician in the state.

Let's make it an even bigger y in 1967. If you have not already 8 your 1967 contribution, why not do it day. If you are already a memb urge your friends and colleagues join by sending their \$20 check for tive membership. And, did you kn your wife can become a member ? for an additional \$10.00 "Never und estimate the power of a woman" is ticularly true in politics. Physicia wives are absolutely essential to P success and we hope to see the n ber of physicians' wives on the OMP du membership roster increase 1967.

Manpower and womanpower a needed for successful political action the 1968 elections.

Febru

You can provide possible <u>immediate</u> protection when an outbreak of influenza A₂ (Asian) hits Multnomah County

New from Du Pont Symmetrel[®] (Amantadine HCI) the first oral chemical agent for the prevention of influenza A₂

makes possible immediate influenza A_2 protection taken before or following suspected contact \blacksquare not a vaccine or antibiotic \blacksquare mique mode of action: acts as molecular barrier to virus penetraion \blacksquare does not interfere with vital cell functions or normal antiody response \blacksquare effective against all influenza A_2 viruses tested to ate \blacksquare may be particularly useful in outbreaks and epidemics for igh influenza-risk patients \blacksquare a high degree of safety in clinical se—no kidney, liver or hematological disturbances have been bserved. For brief summary of prescribing information see reverse side.

Prescribing Information

Indications: "Symmetrel" is indicated for the prevention (prophylaxis) of influenza A_2 in persons of all age groups. Early use is recommended, preferably before or as soon as possible after actual or suspected contact with individuals suffering from influenza A_2 . "Symmetrel" should especially be considered for high influenza-risk patient groups such as those suffering from chronic debilitating diseases and elderly persons.

Contraindications: Not indicated for the prevention of influenzal or respiratory illness other than influenza A_2 or for the treatment of established disease.

Warnings: Administration to patients with central nervous system disease, particularly geriatric patients with cerebral arteriosclerosis, and patients with a history of epilepsy or other "seizures," requires strict observation for possible untoward effects (see Adverse Reactions). Patients taking psychopharmacologic drugs, central nervous system stimulants, or alcoholic beverages should be observed for possible evidence of intolerance. Those patients who experience central nervous system effects or blurring of vision should be cautioned against driving or working in situations where alertness is important.

No teratogenic effects have been seen in reproductive studies in rats and rabbits. Studies in pregnant women have, however, not been done and use of this drug in women of childbearing age should be undertaken only after weighing the possible risks to the fetus against benefit to the pregnant patient. It should not be administered to nursing mothers since it is not known whether the drug is secreted in the milk.

Precautions: Ineffective against bacterial infections. Patients should be observed for idiosyncratic reactions as with all new drugs. Geriatric patients with pre-existing serious medical illnesses with mental or physical deterioration should be followed carefully medically while taking "Symmetrel." (See Adverse Reactions.)

Adverse Reactions: With higher than indicated doses manifestations of central nervous system effects such as nervousness, insomnia, dizziness, lightheadedness, drunken feeling, slurred speech, ataxia, inability to concentrate and some psychic reactions including depression and feelings of detach-

ment were seen. Occasional blurred visio was reported at higher doses. Some of t milder and less pronounced symptoms abo have been reported in a small number patients taking the recommended dosage 200 mg per day. Those were mostly transie and disappeared with continued administ tion of the drug. Some geriatric patients veloped paranoid or hallucinatory behavi and became unmanageable while taking 2 mg daily. Medically unselected seriously teriorated geriatric patients showed poor c ical tolerance after several weeks of da dosing with 200 mg per day. One elderly tient with a history of prior cerebrovascu accident developed visual hallucinations a grand-mal convulsions while on drug at 8 mg per day. Some cases of dry mouth, g trointestinal upset and skin rash and rare tremors, anorexia, pollakiuria, and noctu have been also reported.

Safety: When used as indicated, is generated well tolerated. No kidney, liver, bone marro or hematological disturbances have been served.

Dosage: Adults: Two 100 mg capsules (⁰ teaspoonfuls of syrup) as a single daily do or the daily dose may be divided into ⁰ capsule of 100 mg (or 2 teaspoonfuls syrup) twice a day.

Children: 1 yr.—9 yrs. of age: Calculate ^{tr} daily dose on the basis of 2 mg to 4 mg pound of body weight per day (but not to ceed 150 mg per day). Daily dose, given the syrup, should be given in 2 or 3 eq portions.

9 yrs.—12 yrs. of age: Total daily dose¹ mg given as one capsule of 100 mg ^(c) teaspoonfuls of syrup) twice a day.

How Supplied: Capsules: Bottles of ¹ Each red gelatin capsule contains 100 amantadine HCI.

Syrup: Bottles of 1 pint. Each 5 ml (1 spoonful) contains 50 mg amantadine H⁰

Medical School Schedules Five Postgraduate Courses

"Roentgenology of the Basic Chest" will be the subject of a two-day postgraduate course offered by the University of Oregon Medical School. The class is slated for March 2 and 3.

Enrollment in the course is open to any physician. However, because arrangements must be made for individual instructors, enrollment will be limited and pre-registration is required. Tuition for the course will be \$40 which will include the cost of the programmed-learning test "Principles of Chest Roentgenography" which is to be used in conjunction with the lectures and the practical exercises.

Stress Everyday Problems

The course will stress everyday problems relating to normal anatomy, pathology, and radiographic technic. No attempt will be made to cover the entire field of chest roentgenology. Instead, the emphasis will be on fundamentals including technical considerations, basic approach to chest film interpretation, the thorax, diaphragm and pleura, the lungs, hila and mediastinum and the heart and great vessels.

Although several lectures will be given, most of the allotted time will be spent in small group-sessions or seminars. During these practical exercises, illustrative and problem cases will be presented for discussion by individual instructors and the physicians taking the course. Case material will consist of chest films from the wards and x-ray museum of the medical school as well as cases brought from ther own practices by the participating physicians.

Acceptable For Credit

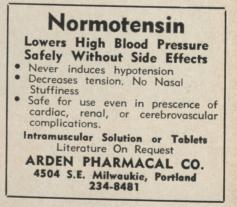

The course will be conducted by the University of Oregon Medical School faculty and is acceptable for 13 hours of AAGP Category I credit. Physicians wishing to enroll in the course should contact the director of continuing medical education at the medical school.

A number of other postgraduate courses are scheduled for later in the year. These include "Review of General Surgery, 1967" on March 9 and 10.

April 27 and 28 will be the dates for a course titled "Computers and Medicine — Is the Show Worth the Price of Admission?" On May 27 the course will be "Commonly Encountered Infections in the Obstetric and Gynecological Patient". "Genetics in Medical Practice" closes out the courses on June 15 and 16.

DR. RIEKE APPOINTED

Multnomah County Medical Society Trustee, Forrest E. Rieke, has been named chairman of the Portland Chamber of Commerce A-1 High School basketball tournament committee. In connection with this Dr. Rieke has asked any physicians who would serve as attending physicians at the individual tournament games to contact him.

1967

80 moderately hypertensive patients did well on triple-drug therapy

Average dosage: One tablet daily with breakfast.

Contraindications: History of mental depression, hypersensitivity, and most cases of severe renal or hepatic diseases. Warning: With administration of entericcoated potassium supplements, the possibility of small bowel lesions should be kept in mind. Discontinue 2 weeks before general anesthesia, 1 week before electrosho therapy, and if depression or peptic ulce occurs.

Precautions: Reduce dosage of concomtant antihypertensive agents by one-half. Discontinue if the BUN rises or liver dysfunction is aggravated. Electrolyte imbaliance and potassium depletion may occul take particular care in cirrhosis or severe

75 of them did even better on Regroton*

Better than reserpine + hydralazine + hydrochlorothiazide in 41 of 43 patients and better than reserpine + methyldopa + hydrochlorothiazide in 34 of 37 patients.

Switch to Regroton[®] chlorthalidone 50 mg. and reserpine 0.25 mg.

ischemic heart disease, and in patients receiving corticosteroids, ACTH, or digitalis. Salt restriction is not recommended. Use with caution in patients with ulcerative colitis, gallstones, or bronchial asthma. **Side effects:** Nausea, vomiting, diarrhea, muscle cramps, headaches and dizziness. Potential side effects include angina pectoris, anxiety, depression, drowsiness, hyperglycemia, hyperuricemia, lassitude, leukopenia, nasal stuffiness, nightmare, purpura, urticaria, and weakness. 6550-IV (B)

For full details, see the complete prescribing information. Availability: Bottles of 100 and 1000 tablets. *Finnerty, F.A., Jr., et al.:Circulation 32:13, 1965. Geigy Pharmaceuticals, Division of

Clifford Allen Appointed To New Post

New chairman of a new department of radiation therapy at the University of Oregon Medical School is Clifford V. Allen, who headed the former division of radiotherapy at the School.

In making the announcement D. W. E. Baird, dean, said, "In the past, radiation therapy has been a subsidiary of general radiology, but the increased knowledge and the development of new equipment and techniques now requires total dedication to one field or the other."

"A large part of the program is supported by the Oregon Division of the American Cancer Society," Dr. Baird added. "We are planning further physical and personnel expansions in the department. This will allow the School to provide additional patient-care services as well as enable us to do more in-depth evaluations of new techniques and advances in the treatment of malignancies."

Dr. Allen is a graduate of the University of Iowa. He was chief of radiotherapy and isotopes at the U. S. Veterans Hospital in Portland for five years before joining the UOMS faculty in 1960. He is a diplomate of the American Board of Radiology and a member of the American College of Radiology,

Dr. Allen Appointed

the Society of Nuclear Medicine, the American Society of Therapeut Radiologists and is a past president the Oregon Radiological Society. He also an active member of the Mu nomah County Medical Society as we as the Oregon and American Medic Associations.

Dr. Allen has conducted extensi research on the combined effects of r diation therapy and surgery in cance and is the author of numerous pape on the treatment of malignancies.

The appointment is subject to appro al by the Oregon State Board of Hig er Education at its next meeting.

Hypnosis Discusse On Call The Docto

"Hypnosis", featuring Robert L. Ha as moderator, will be the February presentation on the Multnomah Cour Medical Society's "Call the Doctor radio program. The program is hea every Sunday at 8 p.m. on KGW rad

Lendon H. Smith will discuss "Ter age Skin Problems" on March 5 wh F. Douglas Day will moderate the d cussion on "Chest Pain" on March

The March 19 presentation will fe ture Donald F. Kelly moderating a pael discussion on "Have You Conterplated Suicide,". Closing out the month of March will be Alvin O. U who will lead a discussion on "Medi-Ethics." This program is set for Mar-26.

TOP PERFORMANCE DEPENDS ON FOLLOW-THRU

The same holds true when you prescribe home-care equipment and supplies for your patients. These health aids must be available when needed. That's why Shaw's carry the Northwest's largest stock of home care items. And, their home-care specialists are trained to give you and your patients the most efficient and competent "follow-thru" service possible.

PORTLAND 5, OREGO

Febru

New Group Takes Command At City Of Roses Hospital

The City of Roses Hospital, a fortybed general hospital in the Sellwood-Moreland area, recently changed hands. A management ownership group associated with Woodland Park Hospital has undertaken the direction and future planning of the institution.

In conjunction with the ownership change, a major renovation of the existing facility is presently underway. Renovation at this time includes new exterior of the building, new emergency facilities, major repairs of utilities and an over-all upgrading of the facility. An expansion program either on the present site or on a closely related site, is being studied.

Physicians Participate

Thirty-nine physicians are identified with City of Roses Hospital and are participating in the reorganization. The hospital has traditionally served the Sellwood area. However, spokesmen for the group indicate the hospital has the potential through traffic patterns and geography of serving the communities of Lake Grove, Lake Oswego, Milwaukie, Oak Grove and southeast Portland.

Medical staff reorganization included the adoption of a new constitution designed for approval by the Joint Commission on Accreditation of Hospital, a strong Executive Committee, a strong Chief of Staff and a division into clinical services of medicine, surgery and OB-Gyn. At the present time, the OB Department is not active, but a study for potential reactivation is being undertaken.

Suburban-Type Hospital

The concept of the hospital will embody much of the philosophy associated with Woodland Park Hospital. In particular, it is felt that a hospital of quality should be located in suburban areas close to the population center,

rather than be concentrated in a core area of the city.

Chairman of the Board is Mr. David H. Fertig. Mr. Richard Mozorosky has been appointed Administrator-Coordinator during the reorganizational period. He is assisted by Mr. Oliver Bergevin, Comptroller, who has been active in Oregon hospital affairs since 1950.

Cancer Case Answer

(Continued from page 40)

WHAT WAS DONE: Chemotherapy with 5-fluorouracil was begun in April, 1965, and has continued to present time, with approximately weekly injections. His dysphagia improved and he has been able to eat any solids that he desired. He gained approximately four pounds and his weight has been stable in the year since his chemotherapy was begun. He requires transfusions approximately every six to eight weeks for recurrent anemia due to chronic blood loss. His activity status is good, and he has minimal lower substernal pain.

Board Of Trustees Honors Three Long-Time Members

One hundred and ten years of active membership in the Multnomah County Medical Society came to an end in January as the Society's Board of Trustees approved changes in membership for three of the Society's elder statesmen.

Adna M. Boyd and Wilbur M. Bolton were both granted life membership in the Society. This membership category is open to any physician who has been an active member of the society for 30 years and who is 65 or older. W. Ronald Frazler was granted active emeritus membership, a category open to any physician who has been active in the Society for less than 30 years and is retired.

Dr. Boyd was born October 26, 1897 in Hastings, Nebraska. A general prac-

titioner, he graduated from the University of Oregon Medical School in 1927. In 1937 he did postgraduate study a t Tulane University. He joined the Multnomah County Medi-

cal Society in 1929. He was also a member of the Oregon Medical Association, the American Medical Association and the American Academy of General Practice.

Dr. Bolton was born in Oregon in 1897. He graduated from the University

of Oregon Medical School in 1926 and interned at St. Vinc ent Hospital. He served his residency in otolaryngology at Portland EENT Hospital and at the New

Dr. Bolton Orleans EENT Hospital. He was licensed in Oregon in 1926 and joined MCMS in 1929. He was also a member of the Oregon Medical Association and the American Medical Association.

Dr. Frazier, an obstetrician-gynecologist, was born September 25, 1904, in

Portland. He travelled to Harvard Medical School and graduated in 1919. He then served residencies at Roosevelt Hospital in New York City and Boston Lying-In Hospital. He was li-

Dr. Frazier

censed in Oregon in 1932 and in 1933 he joined MCMS. He also belonged to the Oregon and American Medical Associations, and the Portland, Oregon, Pacific Coast and Pacific Northwest Ob-Gyn Societies.

Leading The Field...

In Medical, Surgical and Hospital Coverage for over 60 years ...

Here in the Northwest in 1906, National Hospital Association was conceived and created by Hoyt C. Wilson, M.D.—the world's first pre-paid medical-hospital-surgical plan.

National continues to lead the field with the latest and best in health coverage to relieve financial hardship for patient, doctor and hospital—coverage that keeps pace with the needs of the public and the medical profession.

T

County Medical Assistants Slated To Hear Rex Kenyon

All medical assistants, their families, friends and physician employers are being invited to the February 26 dinner meeting of the Multnomah County Association of Medical Assistants. This "Serendipity Night" will feature Rex E. Kenyon, immediate past president of the Oklahoma State Medical Association, as speaker.

Dr. Kenyon, who is regarded as one of the outstanding members of the American Medical Association's Speakers' Bureau, will talk on "Mirror, Miror, on the Wall", the same speech that drew enthusiastic response at the American Association of Medical Assistants convention held last year in St. Louis.

The evening's activities will get underway at 4 p.m. with a social hour followed by dinner at 5 p.m. It is to be held at Riverside-West Motor Hotel, 50 SW Morrison St. Cost for dinner will be \$3.75 per person. Reservations should be made prior to February 23 with Mrs. Dorothy-Jean Anderson, 3415 NE Ainsworth St., Portland.

Tulane Professor Speaks March 10

"Traumatic Neuroses" will be the topic of the March 10 Henry Waldo Coe Foundation lecture. The 8:30 p.m. lecture will be held at the Morningside Hospital Auditorium.

Speaker for the evening will be Gene L. Usdin. Dr. Usdin is Director of Psychiatric Services of Touro Infirmary and Associate Professor of Clinical Psychiatry at Tulane University School of Medicine.

Thinking About Moving?
