

July 7, 1930

To the Finance Committee of the  
Portland Community Chest,  
Portland, Oregon.

Gentlemen:

In anticipation of the approaching merger of the Peoples Institute and the Medical School of the University of Oregon which is being consummated and which will be ready for operation in the new building January 1, 1931, we have prepared jointly with the Medical School a complete consolidated dispensary budget.

This budget includes various items which have not hitherto appeared in our budget as they have been financed by cooperating agencies, although constituting a very substantial part of the dispensary budget.

The consolidated budget provides for a much larger better equipped and more efficient dispensary in every respect and it is with a keen sense of gratification that the Peoples Institute enters into this arrangement with the Medical School, which promises permanency and continued future development for the dispensary work.

The enlarged work which continues the same policies of dispensary management and operation will require the continued and increased interest and financial aid of the cooperating agencies.

The approved budget will be forwarded to you within a few days.

Very respectfully yours,

*Copy*
