

229
Report of the committee for cooperation with allied agencies in interesting the Child Health Committee, in Oregon as a demonstration center.

The committee met with Mrs. A. E. Rockey and Mrs. Otis Wight, from the People's Institute, and Mr. Reynolds, representing Dr. Dillehunt, of the Medical School, for the discussion and adoption of a program to follow, in presenting to Mr. Courtenay Dinwiddie, Executive Secretary of the Child Health Committee, the desirability of Portland or some county in Oregon, as a center for the demonstration in maternal and child hygiene which the Commonwealth Fund is financing in three sections of the United States. It was decided that a report in the form of a letter be sent Mr. Dinwiddie and other members of the Child Health Committee, in which statements be made regarding the geography of Oregon, showing the desirability of Portland as a center for Oregon and Southern Washington; a report of the health activities going on in our state; a statement of the Crippled Children's Law; a brief statement of the facilities in and about Portland for furthering an educational program in child and maternal hygiene, naming the various cooperating agencies and their activities in health work; a brief survey of the industries of the state and their relation to the geography of the state; a statement of the interest of the lay people in health activities, as demonstrated through the attendance and interest shown in the recent Health Exposition; and finally, the purpose for our desire in having either Portland or some unit of Oregon chosen as the field for the activities of the Commonwealth Committee.

It was further decided that a letter be addressed to some 35 or 40 clubs, organizations and individuals, enclosing a multigraph copy of the report sent to the Child Health Committee and requesting that these various organizations and individuals address letters to Mr. Dinwiddie asking that Oregon be chosen as the western center for their health project.

The report is now being drawn up and it is hoped that early in the month this material will be in the mail.

Respectfully submitted,

Chairman.
