OHSU School of Dentistry

Anthology

VOLUME 1 | ISSUE 1 | WINTER 2023

Welcome to the inaugural issue of the Oregon Health & Science University School of Dentistry Anthology.

This publication follows years of planning by leaders from the School of Dentistry Student Research Group, faculty and the OHSU Library. Contributors include Conor Scanlon, Siva Prakasam, Samyia Chaudhry, Christina Truong, Pam Pierce, Robin Champieux and me. The publication is for students, residents, staff members and junior faculty to share their scholarly activity, while learning about the publication process. The short submission-to-publication cycle is intended to be inclusive of a variety of formats and content areas. There are no fees when submitting to the anthology. The publication is peer-reviewed, fully citable and searchable through the OHSU Library Digital Collections.

Narrative Medicine is the practice of listening, observing, and connecting through stories of illness and health helping clinicians and learners to see and engage with the context of patients and communities more intentionally and empathetically. Its use in pedagogy and curriculum can foster health sciences students to approach their roles and patients with more understanding and compassion. The Narrative Medicine collection consists of a wide range of materials produced by both students and professionals and includes poetry, curriculum, articles, artwork, and more
