- Patient Bridge**

Structured Data: Lab Results, CCDs, Allergies, Medications, Problems (Diagnoses), Advanced Directive History, Procedures, Vital Signs, Immunizations, Social History, Family History, Plan of Care

Unstructured Data: Anatomic Pathology Reports, Microbiology Reports, Provider Reports (all documents from a physician), Discharge Summary, History & Physical, Radiology Reports

Centralized Data: Patient resides within Patient Bridge Master Patient Index (MPI). Means more reliable matching and aggregating of records.

Federated Data: Patient matches are done through demographic queries with partners. Partner name and number of documents displays at top of patient chart within Patient Bridge.

View-Only: Member does not send patient data to Patient Bridge. Only views aggregated record from rest of network from a secure web portal.
