**in rheumatic disorders  
whenever aspirin  
proves inadequate**

**Sterazolidin®**  
brand of prednisone-phenylbutazone

Even in the more transient rheumatic disorders an anti-inflammatory effect more potent than that provided by aspirin is often desirable to hasten recovery and get the patient back to work. By combining the anti-inflammatory action of prednisone and phenylbutazone, Sterazolidin brings about exceptionally rapid resolution of inflammation with relief of symptoms and restoration of function.

Since Sterazolidin is effective in low dosage the possibility of significant hypercortisonism, even in long-term therapy, is substantially reduced.

Availability: Each Sterazolidin® capsule contains prednisone 1.25 mg.; Butazolidin® brand of phenylbutazone 50 mg.; dried aluminum hydroxide gel 100 mg.; magnesium trisilicate 150 mg., and homatropine methylbromide 1.25 mg. Bottles of 100 capsules.

# O.P.S. Officer Appointed to Welfare Commission

Mr. Joseph E. Harvey, Jr. president of Oregon Physicians' Service and newly appointed chairman of the State Public Welfare Commission, will be instrumental in creating policy for administration of the new governmental medical aid program for the aged in Oregon.

Harvey's knowledge of the medical field comes through several years of association with Medical Society officers and individual physicians in his work as president of O.P.S.

Harvey, who will work with Morton J. Goodman, Portland, will be in charge of initial policy development and administration of the new medical aid program in Oregon for the State Public Welfare Commission.

Harvey first was appointed to

the State Public Welfare Commission in 1956 by Governor Elmo Smith and was re-appointed last year by Governor Mark Hatfield.

During the past year, the State Public Welfare Commission, spearheaded by a "Medical Care" subcommittee including Harvey and Dr. Goodman, changed the face of the Commission's "Medical Program" with establishment of fees set at 75 per cent of average private practice charges and by cutting red tape through elimination of prior authorization.

The medical profession has qualified men in Harvey and Dr. Goodman who are willing to give their personal time, without remuneration, to the time-consuming job of formulating policy for the new medical aid program through the State Public Welfare Commission.

# Trustees Endorse Losli Candidacy

Ernest J. Losli, 59, recently retired chief of the laboratory services at the U.S. Veterans Hospital in Portland, has been endorsed by the Board of Trustees of the Multnomah County Medical Society in his candidacy for the office of county coroner.

Dr. Losli was drafted for the race by the newly organized Citizens Committee on Health Affairs and was nominated as an independent candidate at a special convention of electors. Later, when a vacancy occurred, the Republican Central Committee nominated Dr. Losli as its candidate.

Dr. Losli accepted the Republican nomination and his name will appear in the Voter's Pamphlet as the Republican candidate.

Dr. Losli, a Board Certified pathologist, meets all the qualifications of a trained medical examiner. If elected, he promises to promote extension of the new state medical examiner system to include Multnomah County. The medical professions supported the medical examiner bill at the last session of the State

Legislature. However, Multnomah County was excluded when the bill was passed into law.

SEPTEMBER

No. 9

## Good Neighbor Campaign Underway; Society Asks Physician Support

President Charles E. Littlehales has announced appointment of Stanley A. Boyd to serve as chairman of the Multnomah County Medical Society's 1960 Physicians Committee on United Good Neighbors.

The campaign among nearly 900 member physicians and 1500 medical employes was launched during the second week in September and will continue through November 10.

Chairman Boyd heads a committee composed of the chairmen of the standing committees of the Society.

Unlike other organizations the Society assumes full responsibility for soliciting member support of the annual community service drive. Pledges are made directly to the Society headquarters and all records are confidential.

A separate campaign is conducted in cooperation with the business and public information offices at the University of Oregon Medical School. However these pledges are totaled under the Medical Section of the Professional Division.

Grouped with physicians in the Professional Division are attorneys, architects, ministers, dentists, certified public accountants and engineers.

---

### Unanimous Vote Grants Two Life Memberships

The Board of Trustees of the Multnomah County Medical Society awarded two Life Memberships by unanimous vote at its meeting on August 31.

Named to Life Membership were Karl H. Martzloff and Oliver M. Nisbet.

Dr. Martzloff graduated from Johns Hopkins School of Medicine in 1917 and was elected to membership in 1924. Dr. Nisbet, a 1920 graduate of Rush Medical College, became a Society member in 1925.

Both men have held important positions in the Society and have made numerous contributions to the benefit of the organization and its members.

# Dr. Martzloff Honored by MCMS, OSMS

Karl H. Martzloff of Portland, a prominent member of the Society for nearly 40 years, received double honors during the past month on the occasion of his retirement from the active practice of medicine.

On August 31 the Board of Trustees of the Multnomah County Medical Society unanimously elected Dr. Martzloff to Life Membership and in so doing paid tribute to his devoted service to the medical profession and the community.

A week later the House of Delegates of the Oregon State Medical Society acclaimed Dr. Martzloff, its 67th President, by unanimously adopting a resolution which awarded him a rarely presented Honorary Membership in the State organization. The resolution, introduced by President Max H. Parrott of Portland, cited Dr. Martz-

loff's leadership in 1937 in developing the Society's first principles for providing medical care for public assistance recipients.

The resolution observed that, "he has held the offices of Councilor, Treasurer, First Vice-President and President and for nearly two decades was a member and chairman of the Committee on Professional Consultation, and also was a Trustee of *Northwest Medicine*.

"Dr. Martzloff has earned national and international recognition in research and as a teacher and clinician which culminated in his elevation to Presidency of the American Gynecological Society."

Dr. and Mrs. Martzloff were guests of honor at the State Society's annual banquet. He received a standing ovation from his colleagues.

after surgery

# ORAL Orenzyme<sup>®</sup>

(oral, enteric coated enzyme tablet 'National')

## SAVES DAYS IN HEALING

*reduces inflammation—eases pain—speeds healing*

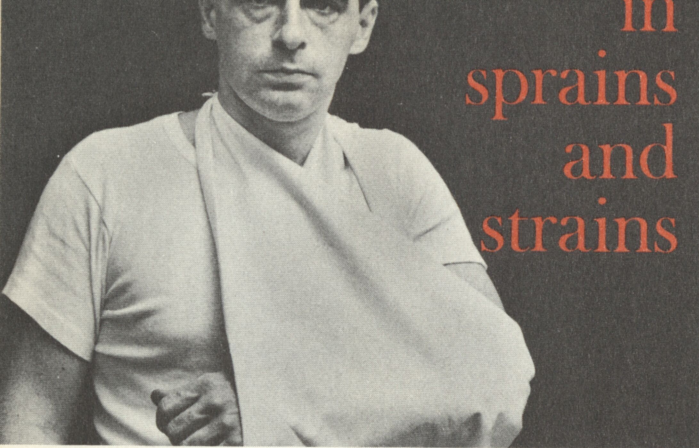

### Systemic Anti-inflammatory Enzyme Therapy

Taken prior to and following surgical procedures, oral Orenzyme clinically demonstrates a marked reduction in postoperative inflammation, swelling and induration.<sup>1</sup> Complications that retard healing, such as stitch tension and breakdown, are effectively minimized. End results are better—days sooner!

also available: **Parenzyme<sup>®</sup> Aqueous** *for intramuscular injection*  
(trypsin 'National')

In  
sprains  
and  
strains

# ORAL Orenzyme®

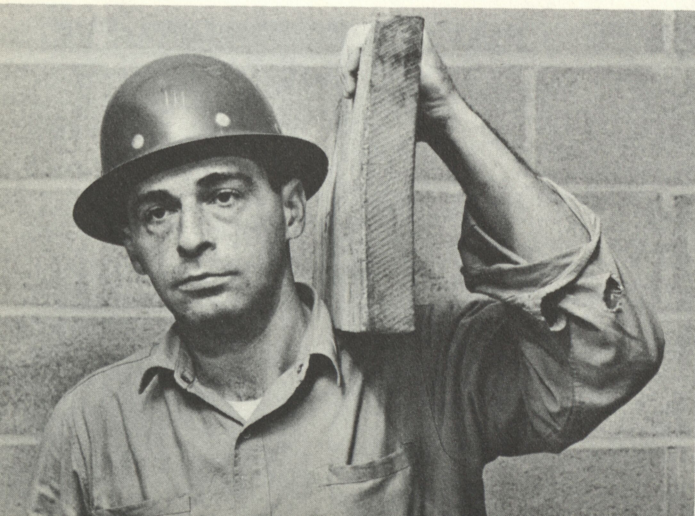

(oral, enteric coated enzyme tablet 'National')

## SAVES DAYS IN HEALING

*reduces inflammation—eases pain—speeds healing*

Oral Orenzyme, the modern help to faster healing, resolves inflammation and edema in sprains, strains and other soft tissue injuries. It combines easy-to-take convenience with the proven anti-inflammatory action of trypsin for "direct facilitation of drainage from the inflamed area."<sup>2</sup> Oral Orenzyme speeds healing, eases pain and helps to get patients back on their feet . . . back on the job . . . *faster!*

Also available: **Parenzyme® Aqueous** *for intramuscular injection*  
(trypsin 'National')

*Composition:* Each tablet contains trypsin 68%, chymotrypsin 30%, ribonuclease 2%, equivalent in proteolytic activity to 20 mg of crystalline trypsin.

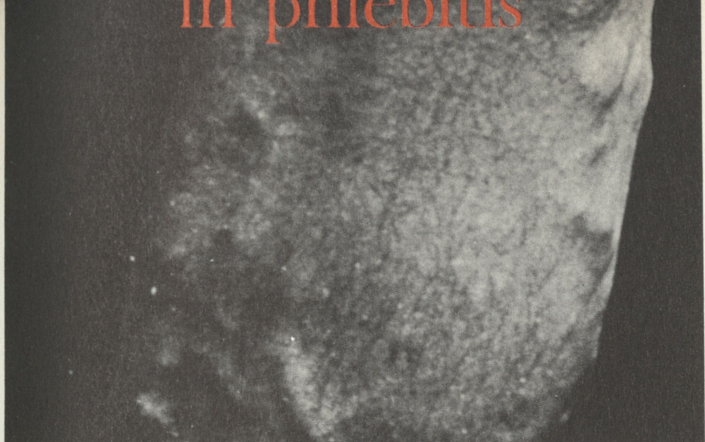

*Dosage:* Adequate dosage is important. Swallow initially, two tablets *q.i.d.* For maintenance, one tablet *q.i.d.*

*Supplied:* In bottles of 48 and 500 red, enteric coated tablets.

*References:* 1. Coleman, F. M., and Vaughn, A. M.: Clinical Results in the Use of Enteric Coated Trypsin, to be published. 2. Tuttle, E.: In press. 3. Pellegrino, P. C.: *Exper. Med. & Surg.* 17:164, 1959.

in phlebitis

# ORAL Orenzyme®

(oral, enteric coated enzyme tablet 'National')

## SAVES DAYS IN HEALING

*reduces inflammation—eases pain—speeds healing*

In phlebitis, prolonged inflammation may lead to valve damage and to impaired venous function. The proteolytic action of oral Orenzyme reduces inflammation and edema—speeds recovery by bringing “relief of pain in less than a week and complete disappearance of all signs and residual tenderness in less than 2 weeks.”<sup>3</sup>

also available: **Parenzyme® Aqueous** *for intramuscular injection*  
(trypsin 'National')

*to hasten healing whenever inflammation and edema hamper therapy or recovery:*

- in
- contusions
- crush injuries
- fractures
- sprains and strains
- hematomas
- dislocations
- postoperative tissue reactions
- phlebitis
- thrombophlebitis
- ulcerations (decubitus, varicose, diabetic)
- ocular inflammations
- other inflammatory conditions such as sinusitis, rhinitis, and cellulitis

- also
- for thinning secretions in bronchopulmonary states:*
- bronchitis
- emphysema
- asthma
- cystic fibrosis
- bronchiectasis

Hard to imagine it now, but only a few years ago the Dolans were resigned to the fate of a childless couple. After four successive spontaneous abortions, the mother's chances of delivering a viable infant were discouragingly slim.

*Capillary protection made the difference.* To the existing prenatal regimen, her physician then added antihemorrhagic factors... Mrs. D. attempted one more pregnancy and, this time, she succeeded perfectly.<sup>1</sup> Fetal salvage rates as high as 95 per cent have been achieved

the  
child  
who  
'couldn't'  
be  
born

when hesperidin complex and ascorbic acid (as provided by Hesper-C Prenatal) were administered with the usual vitamin and mineral supplementation.<sup>2</sup>

*A precaution in every pregnancy.* Since 10 to 20 per cent of all pregnancies do not go to term, it is important to prevent decidual bleeding on a routine basis. The difference in cost is insignificant; the difference in human happiness may be incalculable.

*Supplied:* Bottles of 100 and 500 capsules.

1. Greenblatt, R. B.: *Obst. & Gynec.* 2:530, 1953. 2. Javert, C.: *Obst. & Gynec.* 3:420, 1954.

# Hesper-C<sup>®</sup> Prenatal

CAPILLARY-PROTECTIVE FACTORS

THE NATIONAL DRUG COMPANY  
Philadelphia 44, Pa.

# 3 MILLION-PLUS GOAL SET BY UGN

Goal for the 1960 United Good Neighbors Campaign in Multnomah, Washington, and Clackamas counties is \$3,300,775.

Despite rising costs of services supported by UGN, the 1960 goal has been held to virtually the same amount as last year in an effort to give this year's campaign the best chance for success. Even so, \$236,000 in new money must be raised. This is the difference between the 1960 goal and the total money raised last year.

United Good Neighbors is not a static organization. Two new services have been added—Myasthenia Gravis Foundation and United Seamen's Service. Petitions for inclusion in United Good Neighbors by agencies are continually before the admissions committee who report to the 57 man UGN board.

United Good Neighbors is one of the most inclusive local fundraising federations in the nation.

Campaign costs under the United Good Neighbors plan are 4½ cents out of each dollar contributed. Costs under separate appeals run as high as 25 to 50 per cent and higher, it is reported.

**"Pledge Now and Pay Monthly" is the theme of the 1960 Physician Campaign for support of the Multnomah - Clackamas-Washington Counties United Good Neighbors Drive. The objective: a monthly payment plan should increase individual contributions. The goal: 100% physician participation! HAVE YOU RETURNED YOUR PLEDGE CARD?**

# DECLOMYCIN® NOTES:

Demethylchlortetracycline Lederle

## performance in “complicated” cases

“Extra” activity, milligram for milligram<sup>2-4</sup> is the basis for outstanding clinical performance. Results of DECLOMYCIN therapy were satisfactory in a series of pneumonia cases, over half of which were complicated by pleural, suppurative, bronchial, or underlying structural lung problems.<sup>1</sup>

# School Health Program Receives Attention Of Society's Board of Trustees

The Board of Trustees of the Multnomah County Medical Society has offered its full support to the Portland City Bureau of Health and Portland School Board in "doing whatever is possible to reinstate some essential parts of the school health program during the present school year".

The action followed an announcement by the School Board earlier this year that, due to lack of funds, the entire school health nursing program and other school health activities were being abolished.

President Charles E. Littlehales requested the Committee on School Health (Paul B. Meyers, chairman) to conduct an investigation and report its recommendations to the Trustees at an early date.

The Committee report pointed out that school health nursing services have been provided by the

City Bureau of Health under a contract with the school system. When the School Board withdrew financial support from the program, the city followed by announcing that 15 public health nurses would be discharged and the program discontinued.

For the past six years the Society has recognized a deficiency in the school health nursing program and just recently it was recommended that at least 30 additional nurses be employed by the Portland Bureau of Health to serve the public schools.

The offer to assist the school board and the public health office in reinstating at least some of the essential parts of the program was stated in the following resolution adopted by the Board of Trustees:

*(Continued on page 27)*

**MORE THAN 2.4 MILLION AMERICANS** have ulcers and nearly three times as many men have ulcers as do women, reports the Health Insurance Institute.

Statistics indicate that ulcers are four times as common among Americans now as they were in the 1930's. Ulcers were most prevalent among men in the age group 35-44 where 42.5 of every 1,000 males have ulcers. Highest prevalence for females was in the age group 45-54 where the rate was 17.5 for every 1,000 women.

Ulcers caused an estimated total of 12 million days lost from work during an average year. This means, said the Institute, based on the usual work year of 245 days, that on an average work day 49,000 persons are absent from their jobs due to ulcers.

(Continued from page 26)

WHEREAS, the primary responsibility of a public school system is to provide the finest possible educational program within the limits of tax resources, and

WHEREAS, voters at the May, 1960 election rejected a three million dollar increase in the Portland city tax base for public schools, and

WHEREAS, this action by the voters forced the Portland School Board, District No. 1, to curtail some of its programs, including the school health nursing services, and

WHEREAS, the Multnomah County Medical Society is on record and does presently strongly recommend the inclusion of an adequate school health nursing program in the overall public educational system;

NOW, THEREFORE BE IT RESOLVED, that the Multnomah County Medical Society regrets the action of the Portland School Board in curtailing school health nursing services and calls upon the Board to reinstate the program at the earliest possible date, and urges an immediate study to accomplish this objective, and

BE IT FURTHER RESOLVED, that the Society offers its services to the Portland School Board and the Portland City Bureau of Health in doing whatever is possible to reinstate some essential parts of the program during the ensuing school year.

# Jaycee Past National President to Keynote First MCMS Fall Dinner Meeting

Mr. E. La Mar Buckner of Ogden, Utah, a past national president of the United States Junior Chamber of Commerce, will present a talk entitled "Decade of Decision" at the October 4 dinner meeting of the Multnomah County Medical Society to be held in the grand ballroom of the Hotel Multnomah.

**MR. E. LA MAR BUCKNER**  
Ogden, Utah  
"Decade of Decision"

The meeting inaugurates the 1960-61 series of six outstanding programs for members, their wives, and special guests. All dinner meetings are under supervision of the Society's Committee on Program, Quinten W. Cochran, Chairman.

Buckner, 37, served as national president of the Jaycees in 1954-55, after first holding offices as president of the Ogden Junior Chamber, State of Utah Jaycees, and

national vice-president. While serving as national president he moved to Tulsa, Okla., to assume the administrative responsibilities of 3,000 chapters and more than 200,000 members.

As national president he traveled more than 200,000 miles, speaking at meetings in 48 states, Canada, Mexico, and 15 foreign countries. His extensive travels also include a trip around the world in 1954 and separate trips to Europe, Australia, and New Zealand since that time.

Buckner, an honor graduate from Brigham Young University, is nationally acclaimed as a dynamic and inspirational speaker. Oregon physicians who attended a recent A.M.A. Legislative Conference in Salt Lake City will remember his clear analysis of the political challenges confronting American medicine.

The guest speaker was selected as a Distinguished Award Recipient for the State of Utah in 1952, and in 1953 was winner of the Ogden Distinguished Service Award. During World War II he served as a B-17 pilot in the European Theater with 23 combat missions.

In Ogden, he is a partner in The Buckner Insurance Counselors Agency and extremely active in civic affairs. He is a member of the Board of Directors and treasurer of the Ogden Chamber of Commerce, Ogden Area Lake Bonneville Council Boy Scouts of Ameri-

*(Continued on page 34)*

# Blood pressure that goes up with stress often comes down with SERPASIL®

(reserpine CIBA)

One reason that many cases of hypertension respond to Serpasil is that many cases are associated with stress. Stress situations produce stimuli which pass through the sympathetic nerves, constricting blood vessels, and increasing heart rate. Hyperactivity of the sympathetic nervous system may elevate blood pressure; if prolonged, this may produce frank hypertension. By blocking the flow of excessive stimuli to the sympathetic nervous system, Serpasil guards against stress-induced vasoconstriction, brings blood pressure down slowly and gently.

In mild to moderate hypertension, Serpasil is basic therapy, effective alone "... in about 70 per cent of cases . . ."\*

In severe hypertension, Serpasil is valuable as a primer. By adjusting the patient to the physiologic setting of lower pressure, it smooths the way for more potent antihypertensives.

In all grades of hypertension, Serpasil may be used as a background agent. By permitting lower dosage of more potent antihypertensives, Serpasil minimizes the incidence and severity of their side effects.

## Oregon's Doctor-Citizen Was "On Call"

Just as the head table was seated at the recent 86th Annual Banquet of the Oregon State Medical Society Stanley A. Boyd, Portland, "Oregon Doctor-Citizen of the Year" was called to the hospital for a delivery. Keeping an eye on his empty place with hopes he will return in time to receive the award is Dr. Boyd's wife, Thyra. Seated at right is Miss Bernice Beutz, President of the Oregon State Medical Assistants Association. The Assistants held their Second Annual Meeting at same time as Medical Session.

### A Tribute Well Earned

Special guests of honor at the 86th Annual Banquet of the Oregon State Medical Society were Dr. and Mrs. Karl H. Martzloff, Portland. Congratulating the couple on announcement that Dr. Martzloff, a Past President, had been awarded Honorary Membership in the State Society is Mrs. G. Prentiss Lee, Portland, President-Elect of the State Auxiliary. The Martzloffs and Lees were seated at the head table.

The proved, effective antihypertensive —  
now combined with a safer, better diuretic

## RAUTRAX-N\*

Squibb Standardized Whole Root Rauwolfia Serpentina (Raudixin)  
and Benzydrolumethiazide (\*Naturetin) with Potassium Chloride

**New Rautrax-N lowers blood pressure promptly,<sup>1</sup> maintains a favorable urinary sodium-potassium excretion ratio,<sup>2-16</sup> causes no undue disturbance of the electrolyte pattern.<sup>1-16</sup>**

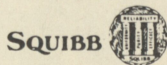

Rautrax-N, combining Raudixin and Naturetin, a new, safer diuretic, facilitates management of all degrees of essential hypertension. It is effective even when rauwolfia alone proves inadequate, or when prolonged treatment, with or without associated edema, is a factor.

Rautrax-N may be used alone or in conjunction with other antihypertensive drugs, such as ganglionic blocking agents, veratrum or hydralazine, should such regimens be needed.

Supply: Rautrax-N—capsule-shaped tablets providing 50 mg. Raudixin (Squibb Rauwolfia Serpentina Whole Root) and 4 mg. Naturetin (Squibb Benzydrolumethiazide), with 400 mg. potassium chloride.

Dosage: initially—1 to 4 tablets daily after meals. Maintenance—1 or 2 tablets daily after meals; maintenance dosage may range from 1 to 4 tablets daily. For complete instructions and precautions see package insert. Literature available on request.

1-16 References available on request.
